

Indoff

Case Study: Rolls-Royce Price George County, Virginia

Problem:

The newly build aerospace facility was in need of a maintenance room to store parts inventory with an optimal capacity storage system.

Objective:

To design a storage system that would meet 5S standards and meet Rolls-Royce specific needs.

Solution:

Indoff, Rolls-Royce and Lista (a leading manufacturer of modular drawer storage systems) worked together to design a storage system that contains over 7,000 compartments.

Benefits:

Special features include a modular Lista 319 drawer storage system with over 7,000 compartments, a Starrett granite beach, a custom mezzanine, Lista workbenches and Lista mobile toolboxes.

“More than pleased with the work that was done. We now have a world class shop to go with our world class factory. Look forward to doing business with Indoff in the future.”
